では、問題を始めます。

Man :

Before summer vacation, our teacher said, "Please write a report during your vacation. You can write about anything you like in our city." I like the river in our city, so I decided to write about it.

First, I used my computer to learn more about the river. I visited our city's website. It said that the river is popular, and a lot of people visit it every year. The next day, I visited our city museum with my father. We saw some pictures of the animals that live around the river. Long ago, there were more animals living near the river than today.

Then, we visited the river ourselves. The river looked clean, but there were some cans and bottles in it. These days, some people throw cans and bottles into the water, so the river is not so clean now. I felt sad when I saw so much garbage.

I saw a frog in the river and took a picture of it for my report. The frog was cute. I hope our river will be cleaner soon so that more animals will live there in the future.
